

Soldering Demystified Tool List

You should bring your basic hand tools, anything you usually use at your bench:

- Scissors
- chain and round nose pliers
- dowels

- Files
- sandpaper
- Tweezers
- Dividers
- soldering blocks
- Sharpie marker
- silver solders etc.

There are a few specific tools I will have you buy at the studio if you don't already have them:

Clean Solderite board

Magnesia block,

Stone tweezers for soldering.

You will want to practice some of the demonstrated techniques on the spot, so you can bring fine or sterling wire, round or half round (any shape, really) to practice soldering ring shanks, bangles, and jump rings. You can also bring fine or sterling silver sheet to practice soldering bezels down, etc.

Tools in the studio-

Third arms

Tripods with thin screens
